**Long Island Association for AIDS Care celebrates American Diabetes Month.**

November is American Diabetes Month, created to raise awareness on diabetes, a growing chronic disease in the United States. This year American Diabetes Month's theme is "Diabetes: Protect our future". Over 25 million Americans live with diabetes and 7 million are living with the disease undiagnosed. Diabetes is the leading cause of kidney failure and a major cause of heart disease and stroke.

Please help spread the message of American Diabetes Month and make the International Diabetes Federation's message heard. In recognition of American Diabetes Month, throughout November 2013 LIAAC, the Long Island Association for AIDS Care, Inc. will be promoting American Diabetes and the severity of the disease on our Facebook and Twitter pages. For more information please visit our Facebook page at <https://www.facebook.com/LIAAC/inc/> or our Twitter page at [https://twitter.com/LIAAC\\_inc](https://twitter.com/LIAAC_inc)
